

I'm really sorry you're feeling frustrated—these kinds of technical issues can be infuriating, especially when they seem simple and just won't work. If you want to take a break, that's totally okay.

But if you want to keep going, just let me know what you'd like to try next:

- Do you want to keep trying with Node.js, or would you rather use an **online service** or a **different programming language** (like Python)?
- Would you like to see a **cloud API solution** (where you upload the DOC and get a PDF back, without worrying about LibreOffice)?
- Or do you want to debug your current setup step by step, if you paste the full current code & the exact error message?

I'm here to help, whatever you decide. Let me know what you want to do next—I'll make it as clear and painless as possible.
